IMPORTANT TIPS ON
HOW TO LET GO OF STRESS & FREE YOURSELF

It's no secret that our **Personal Freedom** these days is in danger...
40% of Americans claim that poor sleep has **made an impact** on their daily life at least once in the past 7 days. (Oxford University Press)
In fact, many don't realize that this impairs our decision-making skills in high-impact, real-world situations when we're sleep deprived.

REAL-WORLD SITUATIONS LIKE...

Dealing with stress due to inflation SKY-ROCKETING

The price of food and gas causes many to suffer mentally, physically, and emotionally.

Not knowing what will happen next because we can't even trust our news sources anymore.

WE REALLY CAN'T TRUST MUCH THESE DAYS....

Whether there's a war raging overseas or we have concerns at our own borders,
WE THE PEOPLE ARE STRESSED, EXHAUSTED, AND AT OUR WITS END!
And I don't know about you, but all this added stress makes it harder to catch a wink or even just a little shut-eye at all!

THE STRUGGLE TO REST & STAY LESS-STRESSED IS REAL!

This quote speaks volumes...

But how do we change ourselves to grow beyond the current state of events???

How can we improve our sleep cycles so that we're less stressed, exhausted, and at our wit's end??
If you're anything like me, you've probably tried it all...
Only to find out time after time what those options just weren't right for me...

The Pandemic Left Us All With No Time to Care For Ourselves.

ALWAYS SO TIRED & SO STRESSED

With our ever changing lifestyles over the past 2 years, some of us worked from home, even more of us had to home school our children, as we were constantly on the go just to stay ahead of the bills and the rise in prices on everything from milk to Krispy Kreme.
With that recipe for disaster, it's no wonder our busy, tiring lifestyles are making it harder for any of us to get a good night's sleep.

PEOPLE MAY BE LIVING LONGER, BUT THEY'RE NOT HAPPIER.

We're more stressed out now than ever before. We need sleep to feel rested & productive.
BUT OUR NATION'S LACK OF SLEEP IS CREATING THE PERFECT STORM.
We need to take back our personal freedom and SLEEP WELL.

The key to better sleep is to get the right amount of sleep. While some people might advocate for eight hours of sleep every night, others might say that 6 is just not enough.

And lest we forget the other **NEGATIVE SIDE EFFECTS** that tend to **HAUNT US** when we're not sleeping well...

1. The Aches & Pains We Feel All Over
2. Age-Related Factors as We Begin to Lose Our Healthier Tissues
3. Skin Changes Due to Our Stressors

As is the case with so many other people these days, it's clear that we are constantly battling at the end of a long day.

I DON'T KNOW ABOUT YOU BUT I'M SICK OF THE NEW WORLD AGENDA KEEPING ME STRESSED, EXHAUSTED, & AT MY WIT'S END!

NOW IS THE TIME FOR THE WE THE PEOPLE TO...

Feel well-rested, rejuvenated, and **FULL OF LIFE AGAIN!**

MANY AMERICANS ARE NOW SAYING THEY ARE:

SLEEPING BETTER — **RECOVERING FASTER** — **REDUCING JOINT PAIN**

...even more now than when the economy was booming!

PUT AN END TO YOUR RESTLESS NIGHTS!

INTRODUCING AN ALL-NATURAL & COMPLETE R&R AID

Vital PROCOLLAGEN®

If you're like most people, you're feeling the growing pressure of inflation and the threat to our personal freedom. As a result, many people are experiencing sleep disturbances. If you are struggling to get a good night's sleep and have been for a while, it may be time to make an investment in the product, PROCOLLAGEN.

PROCOLLAGEN is a dietary supplement that can help you live better and improve your sleep, even with the stress of skyrocketing inflation and the threat to our personal freedom. It can help you sleep better, be more productive, and live better.

THE BENEFITS FROM TAKING VITAL PROCOLLAGEN ARE SO MUCH MORE THAN THAT!

Sleep support from taking Vital ProCollagen

DOESN'T END THERE!!!

With the ultimate rest, relaxation, and rejuvenation supplement from NaturalEP You can also:

Reduce Joint Pain — **Sleeping Better** — **Recovering Faster**

Millions of Americans have experienced the pain and discomfort of joint pain and reduced quality of life. This stress has been a burden on many Americans. However, these burdens can be lifted.
It's a no-brainer that inflation is a big time threat to our well-being, but it's also not entirely that's easy to forget.
The skyrocketing of everyday prices can cause serious joint pain, but there is a way to take back your personal freedom and reduce the risk of joint pain.

You don't have to live in fear or the continuous rise in prices and the threat of our personal freedom. You really can take back control of your life now!

PROCOLLAGEN helps to protect your body from the negative effects of free radicals. Free radicals are formed by by-products of the metabolism of your cells. They are a natural and necessary part of your body's metabolism. But if your body is constantly exposed to them, they can cause a variety of negative effects.

HEALTHY CONNECTIVE TISSUE REGENERATION

There was a time in the past when it was easy to be self-reliant. We had everything we needed in our kitchens and gardens to feed ourselves and our families. Nowadays, even that freedom is being taken away from us. We're forced to rely on others to survive. To help people to regain their personal freedom, especially when we are faced with the high cost of living, a new option is emerging.
The average American spends 90% of their time working.

Unfortunately, this means that they are missing out on something they should be able to do - they are missing out on their personal freedom.
This is why it is so important to take back your personal freedom and allow yourself to live better.
This is why we need a product that can help support our muscles, bones, and joints. A product that will also help with recovery from strenuous activities, such as exercise.

As a society, we have become too disconnected with our food and its effects on our health.
Food is supposed to provide us with nutrients, but today it is almost impossible to avoid the vast amount of processed food and food additives.

The result of this is that the average person is not getting the nutrients they need.

In order to have a well-functioning body and to live a healthy lifestyle, it is crucial to have a balanced diet and to increase your intake of nutrients.
Ultimately the goal is to take back your personal freedom and live a healthy toxin-free life.

Vital PROCOLLAGEN is a dietary supplement that can help you live better and promote regeneration of healthy connective tissues, even when stress, skyrocketing inflation and the threat to our personal freedom is in our midst.

HEALTHY SKIN REJUVENATION

Starting the day off with a smoothie can help you live better and longer, but what about the rest of the day?
How can you rejuvenate your skin, even with the stress of inflation and the threat to our personal freedom?

The stress of these factors can cause wrinkles, dark spots, and dull skin.

And because of the inflation continuing to be on the rise, personal freedom will continue to decrease and our quality of life will go down.
You can take back your personal freedom while living a beautiful and healthy life by incorporating **Vital ProCollagen** into your daily routine.
This is designed to help you live better while rejuvenating your skin.

By adding the supplement to your daily routine, you can take back your personal freedom and rejuvenate your skin.
Just like a smoothie, **Vital ProCollagen** is full of antioxidants and minerals.

This supplement is safe and healthy for all individuals, and it is made to give you the most out of every day.

FROM HERE, YOU HAVE TWO OPTIONS

OPTION 1

GO ABOUT IT AS YOU HAVE...

It doesn't seem like the right option for you. Why? It's simple. The fact that you are still reading tells me that you are eager to find a solution. Nevertheless, I will present you with this option...

You can daydream about sleep. Sleepless nights, staring at the ceiling 60s...dreading rising from your cold, dark bedroom in the morning. Here's hoping one day something magical will happen for you. And maybe you'll get to rest.
The odds of that happening are slim to none. As you wait around for "something to happen," your suffering will continue. Your ability to stay level-headed will unfortunately continue to plummet.

If you don't sleep deeply enough, you'll lose muscle and put on fat since your anabolic hormones won't work as they should while you sleep.

Your mornings will be filled with snooze key press after snooze key press. I hope each 5-minute nap makes you feel more rested. Sadly, it never does. In addition, you will remember the groundbreaking research you read on this page...

This is an incredible offer that you probably regret passing up today. Don't let it pass you by...

By doing nothing, you are making a choice. Staying on that path will lead to your demise. Fortunately, you have the opportunity to take another route now...

OPTION 2

REST AND RELAX WHILE SLEEPING NOW!

Choosing this path is what you were meant to do. You will be able to restore your performance, power, and purpose in life when you buy Vital ProCollagen today.
